SUMMARY

Results-driven MERN Stack web developer with expertise in creating robust and scalable applications. Proficient in HTML, CSS, TailwindCSS, JavaScript, React, Express, and MongoDB, delivering cutting-edge solutions that drive business growth. A collaborative problem solver with a passion for innovation, seeking exciting opportunities to contribute to the success of web development projects.

SKILLS

Front End

HTML5 • CSS3 • JavaScript • Tailwind • React

Backend

Express JS • Node JS

Database

MongoDB

Tools

MS Visual Studio Code • npm packages • git

PROJECTS

EduCamp Summer School

Single Page Application Based on MERN Stack for Educational Institute

[Live](#) | [Client](#) | [Server](#)

- School Management - A comprehensive and scalable single-page application for efficient school management. Dynamic and Secure Routing enables Seamlessly navigating through the application with dynamic routing while ensuring data security.*
- Multi-Role Authentication - Multiple user roles with role-based authentication with Firebase, allowing personalized access and control.*
- Tech Stack - Frontend: React, React-router, TanStack Query, Axios, react-helmet, Tailwind, Framer Motion | Backend: Node, Express | Database: MongoDB Atlas*

Marvel Playland Toy Store

Single Page Application Based on MERN Stack for E-commerce / Online Store

[Live](#) | [Client](#) | [Server](#)

- Store Inventory Management - A scalable single-page application for E-commerce / Online Store management. Product adding, removing, updating product info, sorting, and searching functionality. Routing, Data fetching, and private route using react-router.*
- Firebase Authentication - Allows personalized access and control.*
- Tech Stack - Frontend: React, React-router, Context API, Vite, react-helmet, Tailwind, sweetalert2, daisyUI | Backend: Node, Express | Database: MongoDB Atlas*

The Espresso Pizzeria

Single Page Application Based on MERN Stack for Restaurants / Coffee Shop

[Live](#) | [Client](#) | [Server](#)

- School Management - A scalable single-page application for Restaurant / Coffee Shop management. Product viewing by chefs, Blog page, Login-Registration page. Routing, Data fetching, and private route using react-router.*
- Firebase Authentication - Allows personalized access and control.*
- Tech Stack - Frontend: React, React-router, react fast marquee, Context API, react-lazy-load, Tailwind, daisyUI | Backend: Node, Express | Database: MongoDB Atlas*

EDUCATION

Bachelor of Science in Electrical and Electronic Engineering

Independent University, Bangladesh • 2012-2021

CERTIFICATIONS

Complete Web Development Course

[Programming Hero](#) • 2023

JavaScript Algorithms and Data Structures

[freeCodeCamp](#) • 2023
